Election/Restrictions

1. Claims 10-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 08/26/04.
2. It is suggested that Applicant cancels claims 10-25 in response to this Office action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Ogino et al. (US 2002/0158343 A1).

Art Unit: 2815

Ogino shows a structure of a device having a semiconductor chip 5, comprising an active top side; semiconductor component structures and contact areas 18 disposed on the active top side; a buffer 1 including a protective layer 2 disposed between the contact areas and the above the semiconductor component structures; and having a hard coating 6 at the free surface of the protective layer 2.

Concerning claim 6 and 7, wherein, for example, the active side has a centroid; and the buffer is a plurality of buffer bodies distributed uniformly around a region of a centroid, please see Fig. 3.

Concerning claim 8, please see the above discussion.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ogino et al. (US 2002/0158343 A1) in view of Horiuchi et al. (US 6,455,786 B1).

As per the above discussion, Ogino shows all the structures as claimed in claim 1. However, Ogino fails to show a plurality of semiconductor chips that disposed in rows and columns as claimed in claim 9.

Art Unit: 2815

Horiuchi shows a plurality of chips (see Figs. 8 and 9). Hence, it would have been obvious for Ogio to have more than one semiconductor chips disposed in rows and columns in a semiconductor device environment, as is notoriously known.

Allowable Subject Matter

5. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The applied reference fails to teach and/or suggest the limitations set forth in claims 3-5.
